# Body Magic

## 01. The perfect body

The idea of body reshaping has existed since time immemorial. To resemble an esthetic model of beauty has always been a human obsession. During the 2nd century BC, Cretans created the corset to emphasize the perfection of bodies.

The corset reappeared during Renaissance to reduce the waist and shape the female figure. Throughout the years, this garment has been transformed and improved.

## 02. Body Evolution

The modern body has its origins back in the 60's when the jeans were created. At first, they were high-waisted and tight to reduce the waist, support the hips and push-up the buttocks. In the 80's the body became popular due to aerobics and 'high impact' fashion and it is during that decade that the body acquired its modern design.

### Comfort and effectiveness

Ardyss has combined the best features taken from different tendencies in order to find the perfect balance between the comfort of lycra bodies of the 80's and the rigidity and effectiveness of antique corsets. Consequently, Ardyss has created a luxury reshaping garment: Body Magic.

## 06.

### A unique design

Ardyss Body Magic is designed to exert pressure on the abdomen, generating a protection that prevents fat accumulation in the abdominal walls (posterior, anterior and lateral walls). Once you put it on, it reshapes your body from the breasts (pushing them up) to the crotch area (helping to eliminate local fat). It redistributes flaccid tissues reducing the waist and lifting the buttocks. The structure of the body also corrects your posture and, since it controls the abdomen, you can instantly reduce up to 3 sizes.

## 09. Fat redistribution

Reshaping results obtained with Ardyss garments can be compared to those of liposculpture, but without surgery. This is thanks to the unique fat redistribution system which consists of transporting fat cells. Such cells can simply be transported to those areas where we need fat, for example breasts or buttocks. If there is fat excess it is transported to the solar plexus to favor fat elimination through the lymphatic system. Thanks to the pressure exerted by Ardyss reshaping garments, fat cells can be eliminated through urine.
